HOW WORKS?

intelACe provides smart control that improves the existing thermostat based control in Air Conditioners. It optimizes the Air Conditioner operation under all usage requirements and conditions.

intelACe gives Air Conditioners:

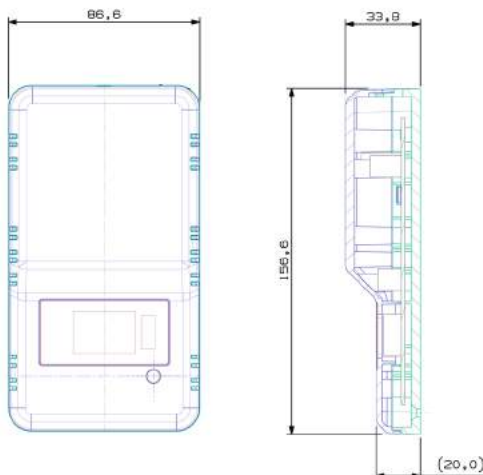

- Active and intelligent compressor control.
- Zero loss from thermodynamic saturation.
- Full utilization of cooling capacity in cooling coil (heat exchanger).

This approach ensures the required room temperature is achieved, compressor operation optimized and thermodynamic saturation of refrigerant is avoided, resulting in huge energy savings and reduction in breakdowns.

- intelACe Intelligent Efficiency Main Unit
- intelACe IR Remote Controller
- Wago Cable Connector
- M3 Screws x 2
- M3 Wall Plugs x2
- Quick User Guide

WHAT'S IN THE PACKAGE?

TECHNICAL SPECS

- Operating Voltage : 85~305 VAC
- CE LVD, EN60730-1 & EN60730-2-9 Certified
- IR Remote Control
- 14.22mm Size Digit Display
- 0.5°C High Accuracy Temperature Sensor
- ABS Plastic Enclosure
